

# MYOB EXO Employer Services Timeclocks

An easier, more accurate solution to capture staff times.

Keeping an accurate track of employee's time has always been a challenge for businesses. Traditionally, employers have used manual punch cards as a way of keeping track of attendance. The MYOB EXO Employer Services Timeclock includes various methods for employee clocking including biometric (fingerprint) scan, proximity card, magnetic swipe card, and basic keypad entry.

## Improving the time capture process

Implementing MYOB EXO Timeclock will immediately improve your time capturing processes, which in turn enhances your payroll process. Combine EXO Timeclock with the EXO Time and Attendance module, to produce a high-class time capture solution that provides seamless integration for immediate data processing.

## How does it work?

MYOB EXO Timeclocks mounts on a wall and allows employees to clock in and out using several methods of identification. The in and out entries for each employee are captured and saved as time stamps then can be updated (and are available for review).

## Robust and flexible design

Designed and manufactured in Australia, the EXO Timeclock provides several methods of employee identification as well as large and easy to read displays. Through the use of two relay outputs on each timeclock, businesses can implement either a meal break alarm or control "door" access to secure areas, via a single device. Using Industry standard communications, EXO Timeclock comes standard with a 12-month return to base warranty.

### Key features and benefits

- > Various identification methods to suit the workplace environment and budget: biometric (fingerprint) scan, proximity employee card, magnetic employee card or keypad entry
- > Keypads and barcode readers can be connected to provide additional data entry such as cost centre and job costing allocation
- > Job costing and tracking through keypad or barcode scanner entry
- > Competitively priced and fast return on investment
- > Optional accessories: multi-card formats (magstripe, proximity, barcode)
- > 5 hour optional operational backup (UPS)
- > Eliminates 'time theft' by enforcing user identity and time entry
- > Reduces error rate for incorrect time capture
- > Major time saving on manual time capture methods
- > No duplication of time entry
- > Creates a robust class time capture solution with seamless integration for immediate data processing, when combined EXO Timeclock and EXO Time and Attendance modules.

# MYOB EXO Employer Services Timeclocks Fact Sheet

## Extensive, established partner network

The EXO Suite of products are implemented and supported by our expert MYOB Partner Network across Australia and New Zealand. We provide educated advice regarding the entire range of MYOB EXO Business and Employer Services Solutions and work with you to design a solution that meets the unique needs of your business.

## An integrated business solution from MYOB

A range of additional modules are available and can be adopted and tailored to your business. With the assistance of an MYOB EXO Partner, we can build a comprehensive business management system tailored specifically for your business requirements.
